

toil, venery, masturbation, onanism and other forms of vital prostration. Every physician of any reasonable amount of practice frequently has cases of impotence, mental and physical, demanding the prescription of peculiar tonic stimulants and aphrodisiacs that shall be certain in effect, yet non-irritant or reactionary. This want is generally met in these beyond all question most perfect vitalizing agents known, and hence peculiarly adapted to all cases of female disease, marasmus or wasting, dyspepsia, consumption, all anæmic cases, and those morbid states resulting in epilepsy, hysteria, despondency, melancholia, insanity and suicidal depression, all of which result from uterine, ovarian, cerebral, nervous, prostatic and seminal exhaustion, respectively, in either sex.

The remedials which I prepare will revive lost energy from whatever cause—trouble, exhaustion, excess—for they are nervous force and vital power in tangible form and act not by stimulation but by invigoration, restoring magnetic and dynamic power when nothing else on Earth can do it.

In no sense whatever are these preparations empirical productions or patent medicines. Their discovery opens a new era in the curative art. They are not medicines, but dynamic agents; have been thoroughly tested in France, England and thirty-two states of this Union; and where properly administered or taken it is doubtful if a case exists of incipient consumption, wasting, nervousness, hypochondria, hysteria, nervous or vital prostration, leucorrhea, sterility, brain softening, spermatorrhea, mental wandering, general debility or weakness from organic exhaustion that they will not speedily and radically cure because of their extraordinary dynamic power.

Through these remedials many have regained health; old men and barren women have become happy parents, and patients standing on the verge of death have been rendered

TO THE READER:

At the last moment, before this work left the press, admonished by new paralytic symptoms resulting from my railroad accident, I have resolved to print herein the private information alluded to in the pamphlet (ASGILL'S Rules, etc.) The omitted portions thereof will be written to those who need them as per conditions set forth below:

A PHYSICIAN'S LEGACY TO HUMANKIND—ASGILL'S RULES

Sad are the times when wedded wives decay,
And brothels flourish, and Cyprians bear the sway;
These are the times! their scarlet banner waves,
And honest wives, neglected, fill up a million graves!

Since Dr. Dixon of *The Scalpel* printed his great and warning essay on *The Organic Law* (of sex) and the anonymous author of *Satan in Society* faintly echoed those stirring notes, nothing has been given to the world on this mighty subject worthy of attention or record. Neither essay filled the required bill, and for that reason I print this series of salvatory counsels. I may, and probably shall, ere long be numbered with the armies of the dead; and who then will give Randolph's thoughts to the world? I don't know, and therefore give at least a part of them before I leave for good and all; consequently, as an addendum to this pamphlet, I shall now convey certain brief and concise forms of certain knowledges which if abided by will prolong many a life and add immeasurable happiness to mankind. I wish to be clearly understood and yet not offend the most delicate or fastidious, for God is my judge that my sole aim is to teach certain truths whose mission is to stop the tide of

crime, misery and wretchedness now devastating our land. I am forced to use similes, but trust to be fully and entirely understood. On the proper use of every human function depends the weal and happiness of life. Letters addressed to me will be attended to no matter whether I am alive or dead.

P. B. RANDOLPH

I. Balzac says: "He who begins with his wife by a rape is a lost man!" for, I say, it is next to impossible that she ever can love him *after*, as *before*! and I say this after a large medical practice of not less than thirty years. But most "Men" (?) not only begin thus, but keep it up—the brutes!—and their name is legion!—till hatred, horror and disgust either kill her outright, or suggest an evil from which every true human shrinks.

II. Abortion at any stage from conception to birth is—MURDER in the first degree. It effectually *kills* the child, demoralizes the mother, *destroys* her *moral* and physical health while living, and after death *dooms*, irrevocably DOOMS, her and her assistants to the perpetual society of MURDERERS beyond the grave, from which doom there is *no* appeal. So beware of the crime.

III. Circumstances may demand nonincrease of family; therefore, avoid all risk forty-eight hours before and one hundred after the catamenial period. Avoid all risk after a return from a journey or temporary absence; and

IV. After the *makeup* following an unpleasantness, tiff, spat or downright family quarrel, because the reaction creates not only increased affectional and procreative energy, but also a peculiar liability to the risks of unwished-for parentage.

V. Mental, moral, physical and domestic trouble, mutual magneto-vital exhaustion are easily preventable between couples if they will but sleep apart, have hard beds, good ventilation, never sleeping in day-worn underclothes and
